rotary micro annular gear technology

The micro annular gear pumps mzr-2909 Ex, mzr-4609 Ex and mzr-7209 Ex cover the flow range 0.003-225 ml/min. The highly precise, pulseless small volume dosage even of non-lubricating liquids or at high pressure, the

compact design of the Ex-pumps, the broad viscosity range and the small measurements are unique features of this pump series. The pumps are applied in the field of chemical and process technology and are suitable for both

continuous delivery and discrete dosage of watery solutions, solvents, oil and other viscous liquids. Accessories extending the operating parameters of the device are available.
