

I Application

Due to the choice of materials and its design, PROLAC HCP is appropriate for applications requiring a high level of hygiene, gentle handling of the product and resistance to chemical agents.

It is particularly suitable as main process pump in the dairy, beverage, pharmaceutical and cosmetic industries.

I Design and features

PROLAC HCP is a range of close-coupled centrifugal pumps with hygienic design, compact and highly efficient. It is made of a cold-formed stainless steel casing, impeller, mechanical seal, pump cover, lantern and shaft, connected to the motor shaft by mechanical compression.

The motor complies with the IEC standards, it is protected with a stainless steel shroud and provided with the height adjustable hygienic designed legs.

The pump is EHEDG certified, it is especially designed for CIP/SIP without disassembly.

Option: casing with aseptic connections

I Mechanical seal

The PROLAC HCP pump is provided with a internal single mechanical seal. The seal is balanced and has a hygienic design. As standard, the stationary part is in carbon and the rotary part is in silicon carbide, the gaskets are in EPDM. However, when required, both parts of the mechanical seal can be in silicon carbide as well as the gaskets can be in FPM.

There is also an option of assembly of a double mechanical seal made of two identical seals. It helps to upgrade a pump with single seal and simplifies its maintenance.

Double mechanical seal

I Technical specifications

Materials

Parts in contact with the product	Stainless steel AISI 316L (1.4404)
Other steel parts	Stainless steel AISI 304 (1.4301)
Gaskets in contact with the product	EPDM

Mechanical seal

Rotary part	Silicon carbide (SiC)
Stationary part	Carbon (C)
Gaskets	EPDM

Surface finish

External	Matt
Internal	Bright polish Ra<0,8µm

Connections

DIN 11851 (standard)
 Aseptic flange DIN 11864
 CLAMP
 SMS
 (other connections available on request)

Operating limits

Nominal pressure	1600 kPa (16 bar)	232 PSI
Temperature range	-10°C to +120 °C	14 °F to 248 °F
	+140°C (SIP, max. 30 min.)	284 °F
Maximum flow	220 m³/h	968 US GPM
Maximum differential head	140 m	459 ft
Maximum speed	3600 rpm	

I Motor

Triphasic induction motor with B5 flange and B3 legs, in compliance with the IEC standards, 2 poles = 3000/3600 rpm, IE-2 efficiency class, IP 55 protection and F-class insulation.

3 phases, 50 Hz, 220-240 V Δ / 380-420 V Y, ≤ 4 kW
 3 phases, 50 Hz 380-420 V Δ / 660-690 V Y, ≥ 5,5 kW

I Options

- Pump casing with drain port.
- Pump casing with heating chamber.
- Different types of connections.
- SiC/SiC mechanical seal.
- Double mechanical seal.
- FPM gaskets.
- Motor with other voltages, frequencies and protection classes.
- Motor for explosive atmospheres or with enhanced safety level.
