

Centrifugal pump ZA/ZAL

The pump type ZAL with its specially designed impeller achieves a maximum pressure of up to 10 bar with a single stage. It also ensures gentle and quiet product pumping. Due to the steep characteristic curve of the pump it can be controlled well with a frequency converter. The ZA pump is suitable for applications with high flow rates at high delivery pressures.

Features

- dead space-free design (hygienic design)
- very quiet operation
- CIP and SIP compliant
- simple design/low maintenance costs
- sturdy design comprising high-quality chromium-nickel-molybdenum stainless steel 1.4435 (316L) with electropolished surfaces
- pumping of solids-laden media with no risk of clogging
- ideal for fast temperature changes thanks to sturdy design
- the sturdy design allows handling of abrasive and corrosive media
- option for various mechanical seal systems
- high delivery head with a single stage pump

Optional forms

- **ATEX** for zones 1, 2, 21 and 22
- **pharma design** for maximum safety, reliability and hygiene (surface roughnesses down to Ra < 0.4 µm)
- **magnetic coupling** hermetically sealed version ZALM and ZAM for crystallising, toxic, flammable and environmentally hazardous liquids
- **vertical installation** for simple residual drainage
- **bearing housing** for special requirements
- **mobile** with sturdy trolley and accessories to customer requirements
- **heatable** with liquid or heating cartridge

High-quality materials ensure that the media remains pure.

| | |
|-------------------|---------------------------------------|
| Flow rate Q | max. 100 m³/h |
| Delivery head H | up to 100 m |
| Temperature range | minus 30°C to 130°C, max. 145°C (SIP) |
| Viscosity | up to approx. 500 mPas |
| Nominal pressure | PN10 to PN100 |
