Series GA/GAH
MAGNETIC DRIVE GEAR PUMP

When you need a low-flow pump that delivers high-performance in a small package, Series GA is an excellent solution. Series GA pumps provide precise, pulseless flow, and feature Micropump’s suction shoe design that allows the pumps to self-compensate for wear ensuring near zero slip and a long pump life. Series GAH extends Series GA to high-system pressure applications making Series GA pumps ideal for a wide-range of low-flow applications.

SUCTION SHOE STYLE PUMPS
Suction shoe style pumps self-compensate for wear, are excellent for continuous duty processes, and offer improved efficiencies when pumping at higher pressures.

SMALL SIZE
The miniature package size of the Series GA/GAH is easily incorporated into the design of many systems.

FLUID PATH INTEGRITY
The magnetic drive and static o-ring seal(s) keep the fluid securely inside the pump and potential contaminants out.

SMOOTH PULSELESS DELIVERY
Positive displacement, precision gears provide consistent fluid delivery in continuous processes.

CHEMICALLY RESISTANT
Series GA/GAH has a long life in aggressive environments.

EASY TO SERVICE
Series GA/GAH pumps are easy to service using a Micropump® service kit and simple hand tools.

HIGH-SYSTEM PRESSURE CAPABILITY
Series GAH pumps are designed to withstand system pressures up to 345 bar (5000 psi).

WIDE RANGE OF CONFIGURATIONS
Micropump’s designs offer a wide range of configurations to meet your more challenging requirements including:
- Multiple gear, body, and o-ring materials
- High-torque magnets
