SOLUTIONS PROVIDER

With over 110 years of expertise, each Viking pump is uniquely designed for the task at hand, from simple solutions to your most advanced and demanding needs.

QUALITY MANUFACTURING

Viking's vertically integrated production process, from raw materials to finished product, meet ISO 9001:2015 quality standards. Global manufacturing footprint in the Americas, Europe and Asia use Six-Sigma and Lean Kaizen tools.

RELIABILITY, QUALITY & PERFORMANCE

Offering one of the broadest selections of pumping principles, designs, materials and options available, Viking pumps are time and field tested to meet or exceed your expectations.

APPLICATION & INDUSTRY SUPPORT

Channel support group of application, sales and design engineers develops unique pumping solutions for both OEM manufacturers and pump end users with unique requirements.

GLOBAL SALES & SERVICE

Viking pumps are in operation on all 7 continents. Our worldwide network of factory-trained distributors understand your application and service needs.

DID YOU KNOW?

Viking Pump founder, **Jens Nielsen**, invented the first ever internal gear pump; patented on February 4th, 1904.

QUALITY & LAB SERVICES

ANALYTICAL SERVICES FOR OPTIMUM PERFORMANCE

Enable best possible pump selection for your liquids and process conditions

Validate pump performance before installation with certified pump tests

Satisfy engineering specifications and governmental regulations

Test your pump only, or the complete unit (pump, reducer & drive)

Guarantee accuracy with NIST-traceable calibration

Test at your required viscosities

Watch our product engineering lab video

LAB RESOURCES

- | Dynamometers
- | Data Acquisition Tools
- | Viscometer
- | Test Liquids from 28 to 25,000 SSU
- | Machine Shop

TESTING SERVICES

- | Pneumatic Testing
- | NPSHr Testing
- | Sound & Vibration
- | Visual Inspection & Measurements
- | Material Testing
- | Liquid Sample Analysis
- | Positive Material Identification
- | Traceability
- | Magnetic Particle Testing

CERTIFIED PERFORMANCE TEST

- | Factory testing to ensure your Viking pump meets your performance requirements
- | Using state-of-the-art dynamometers and data gathering software, tests can be performed on a variety of liquids to best duplicate your unique conditions of service
- | 9 dynamometers through 300 HP
- | Oils, solvents, water and other test fluids
- | Witnessed testing available

CERTIFIED HYDROSTATIC TEST

- | Hydrostatic testing ensures that your pump will not leak at or beyond your application pressure, using petroleum-based or non-petroleum test fluid
- | Test condition is at 1.5x the maximum operating pressure or 250 PSI (whichever is greater)
- | Pressure and duration may be changed to meet customer specifications
- | Pneumatic testing also available

Note: Not all tests are available at all manufacturing locations.

MARKETS & APPLICATIONS

WE HAVE THE PRODUCTS FOR YOUR INDUSTRY

We have experience with thousands of liquids that allow us to deliver proven solutions for your application, whether it is thin / thick, hot / cold, edible / toxic, liquid / solid and much more.

CHEMICALS

- Acids & Bases
- Alcohols & Solvents
- Soaps & Detergents

POLYMERS

- Rubbers & Plastics
- Fibers & Resins
- Polyurethanes

OILS

- Crude Oils
- Lube Oil & Greases
- Asphalt & Bitumens

FUELS

- Refined Fuels
- Biofuels
- Liquefied Gases

PHARMACEUTICAL

- Medicinal Chemicals
- Creams & Ointments
- Blood & Plasma Processing

MACHINERY

- Fuel & Lube
- Heat Transfer Liquids
- Filtration

FOODS

- Liquid Sugars
- Chocolate & Confectionery
- Edible Oils

DAIRY

- Butter
- Cheese
- Cream

PULP & PAPER

- Coatings
- Starch
- Black Liquor Soap

PERSONAL CARE

- Lotions & Creams
- Toothpaste
- Hair & Skin Care

WATER & WASTEWATER

- Methanol
- Polymers
- Additives

COATINGS & SEALANTS

- Paints, Dyes & Inks
- Adhesives
- Caulks

BEVERAGES

- Distillers & Vinters
- Fruit & Vegetable Purees
- Carbonated Drinks

32-33	34-35	32-33	34-35

OPERATES AT ANY POINT ON THE CURVE

- High efficiency at full range of speeds
- Flow rate largely independent of changes in pressure

LONG SEAL & BEARING LIFE

- Generally operated at speeds from 10 to 1750 RPM, for increased seal and bearing life

LOW SHEAR

- Documented shear rates enable selection of proper pump and speed to protect shear-sensitive liquids

LOW NPSHr

- Enables suction lifts, handling fluids prone to flashing, and pulling from vacuum vessels

FLOW PROPORTIONAL TO SPEED

- Provides easy control of flow rate with a variable speed drive for excellent metering capabilities

HANDLES A WIDE RANGE OF VISCOSITIES

- Capable of handling up to 2,000,000 SSU (440,000 cSt)

SIMPLE MAINTENANCE

- Seal, head and gear replacement can usually be done in place without removing pump from piping

SELF-PRIMING

- Enables priming if pump is above liquid level
- Some Viking pumps are capable of suction lifts up to 20 ft (6 m)

REVERSIBLE DIRECTION OF FLOW

- Use same pump for loading and unloading or line stripping

INTERNAL GEAR PUMPS

WHY? The internal gear pump is the "workhorse" of countless manufacturing processes.

- Broadest selection of materials, designs, seals, ports and displacements
- Adjustable clearances enable handling viscosities from 28 to 2,000,000 SSU (1 to 440,000 cSt)
- Low shear

KEY PUMPING ELEMENTS

MATERIALS OF CONSTRUCTION & CONFIGURATION OPTIONS

EXTERNALS (HEAD, CASING, BRACKET)

Cast iron, ductile iron, steel, stainless steel, and other alloys

INTERNALS (ROTOR, IDLER)

Cast iron, ductile iron, steel, hardened steel, stainless steel, and other alloys

BUSHINGS (SLEEVE BEARINGS)

Carbon graphite, bronze, hardened cast iron, silicon carbide, tungsten carbide, and other specials materials as needed

SHAFT SEAL

Lip seals, packing, O-Pro® seals, component mechanical seals, industry-standard cartridge mechanical seals, API 682 seals and sealless magnetic couplings

TYPICAL APPLICATIONS

Common internal gear pump applications include, but are not limited to:

- All varieties of refined fuels & lubricants
- Resins & polymers
- Alcohols & solvents
- Asphalt, bitumen & pitch
- Polyurethane foam (isocyanates, polyols & additives)
- Food products such as corn syrup, chocolate & peanut butter
- Paint, inks & pigments
- Soaps & surfactants
- Heat transfer fluids

Learn how internal gear pumps work

The Internal Gear Pump was invented by Viking Pump's founder, Jens Nielsen, in 1904. It is used in manufacturing many of the products that we all touch every day.

ADVANTAGES

Only Two Moving Parts | Reliable & easy to maintain

Adjustable End Clearances | For low or high viscosities, high temperatures, or to compensate for wear over time

Shaft Seal Options | Including packing, lip seal, O-Pro® seals, component seal, cartridge seal and sealless mag drive

Porting Options | Viking's broadest selection of port locations, configurations and types

Smooth, Non-Pulsing Flow | For accurate flow measurement

One Shaft Seal | More reliable and lower cost than two or four seals used on timed lobe and screw pumps

Compact, Close-Coupled Options | For motor speed operation or with gearmotors

* With special construction

CAPACITY
to 1,600 GPM
(363 m³/h)

PRESSURE
to 250 PSI
(17 BAR)

VISCOSITY*
to 2,000,000 SSU
(440,000 cSt)

TEMPERATURE*
-120°F to +800°F
(-85°C to +430°C)

EXTERNAL GEAR PUMPS

WHY? The external gear pump is the ultimate solution for high pressure, low flow pumping.

- Bearing support on both sides of the gears enables differential pressures to 500 PSI (34 BAR), or Intermittent to 2,500 PSI (170 BAR)
- Motor speed operation eliminates cost of speed reducer
- Eliminates lubrication – no external axial or radial bearing required in most applications

INCLUDED PRODUCTS

- SG-04 Series™
- SG-05 Series™
- SG-405 Series™
- SG-805 Series™
- SG-07 Series™
- SG-407 Series™
- SG-807 Series™
- SG-10 Series™
- SG-410 Series™
- SG-14 Series™
- SG-414 Series™
- CMD Series™

CERTIFICATIONS

- NSF
- UL / CUL
- CE
- ATEX

Note: Not available for all products in all markets.

Learn how external gear pumps work

KEY PUMPING ELEMENTS

MATERIALS OF CONSTRUCTION & CONFIGURATION OPTIONS

EXTERNALS (HEAD, CASING, BRACKET*)

Ductile iron, carbon-filled PVDF

* SG-10 Series™ and SG-14 Series™ brackets are Cast Iron

INTERNALS (SHAFTS)

Steel, alumina ceramic

INTERNALS (GEARS)

Steel, carbon filled PTFE

BUSHINGS (SLEEVE BEARINGS)

Carbon, silicon carbide, needle bearings

SHAFT SEAL

Lip seal, component mechanical seal, sealless magnetic couplings

TYPICAL APPLICATIONS

Common external gear pump applications include, but are not limited to:

- Various fuel oils & lube oils
- Chemical additive & polymer metering
- Cooking oil filtration / reclamation
- Isocyanates & polyols
- Industrial & mobile hydraulic applications
- Low volume transfer or application

The External Gear Pump with spur gears offers higher pressures and unique abilities to supply multi-section specialty pumps with one driver.

ADVANTAGES

Higher Pressure Capabilities | With shaft support on both sides of the gears

Shaft Extension Options | Include keyed, tang and spline

Shaft Seal Options | Including lip seal, component mechanical seal and sealless mag drive options

Compact, Close-Coupled Options | For motor speed operation or with gearmotors

Smooth, Non-Pulsing Flow | For accurate flow measurement

Reliable & Easy to Maintain | With only two moving parts

One Shaft Seal | More reliable and lower cost than two used on timed lobe and screw pumps

Precision Clearances | For low flow metering and dosing applications down to 0.06 GPM (0.23 LPM)

* With special construction

CAPACITY
to 190 GPM
(719 LPM)

PRESSURE
to 500 PSI (34 BAR)
Intermittent to 2,500 PSI (170 BAR)

VISCOSITY*
to 1,000,000 SSU
(250,000 cSt)

TEMPERATURE*
-40°F to +450°F
(-40°C to +230°C)

CIRCUMFERENTIAL PISTON PUMPS

WHY? Gentle handling of high value shear sensitive liquids across hygienic and industrial applications.

- Wide range of displacements with high pressure capabilities
- Excellent at solids handling
- Low shear characteristics across a wide range of product viscosities

INCLUDED PRODUCTS

- Revolution® Series
- TRA®20 Series
- TRA®10 Series

CERTIFICATIONS

Learn how circumferential piston pumps work

MATERIALS OF CONSTRUCTION & CONFIGURATION OPTIONS

PRODUCT WETTED

Rotorcase, Rotor Retainers, Front Cover:
316 / 316L stainless steel

Rotors:
Alloy 808 & 316 / 316L stainless steel

GEARBOX (GEARBOX, MOUNTING FEET & BACK PLATES)

Stainless Steel & cast iron, dependent on pump series & size

SHAFT SEALS

Single & double mechanical seals, single & double O-ring seals

TYPICAL APPLICATIONS

Common circumferential piston pump applications include, but are not limited to:

- Food products: processed meats, vegetables, sauces & condiments
- Confectionary: chocolate, fondants
- Beverages: alcoholic, soft
- Dairy products: milk, cheese, yogurts
- Personal care products: shampoo, soaps, deodorants, cosmetics
- Pet foods
- Pulp & paper
- Chemicals: lubricants, paints & pigments, polymers

KEY PUMPING ELEMENTS

Circumferential Piston Pumps are widely used in many hygienic and industrial fluid handling applications where gentle handling, cleanability and efficiency are paramount.

ADVANTAGES

Shaft Sealing Options | Include single & double mechanical seals, single & double O-ring seals

Porting Options | Multiple porting options cover hygienic and industrial threaded, clamp and flanges arrangements

Low Shear Pump Design | Gentle handling of delicate and shear sensitive products

Solids Handling | Will handle a wide range of products including suspended solids

Efficiency | High volumetric efficiency on low viscosity products

Hygienic Designs | Used in a wide range of hygienic industries where cleanliness is important

CAPACITY
to 450 GPM
(102 m³/h)

PRESSURE
to 500 PSI
(34 BAR)

VISCOSITY
to 2,000,000 SSU
(440,000 cSt)

TEMPERATURE
to +300°F
(+150°C)

ROTARY LOBE PUMPS

WHY? Gentle handling of high value shear sensitive liquids across hygienic and industrial applications.

- Wide range of displacements
- Good solids handling capabilities
- Low shear characteristics across a wide range of product viscosities

INCLUDED PRODUCTS

- SteriLobe® Series
- Revolution® Series
- RTP® Series
- Classic+ Series™ / MultiPump® Series

CERTIFICATIONS

Learn how rotary lobe pumps work

KEY PUMPING ELEMENTS

MATERIALS OF CONSTRUCTION & CONFIGURATION OPTIONS

PRODUCT WETTED (ROTORCASE, ROTORS, ROTOR RETAINERS, FRONT COVER)

316L stainless steel, other alloys also available

GEARBOX (GEARBOX, MOUNTING FEET & BACK PLATES)

Cast iron & stainless steel, dependent on pump series & size

SHAFT SEALS

Single, single flushed & double mechanical seals; single & double O-ring seals; packed glands; composite seals, all dependent on pump series

TYPICAL APPLICATIONS

Common rotary lobe pump applications include, but are not limited to:

- Pharmaceutical & biotech, including vaccines
- Food products: processed meats, vegetables, sauces & condiments
- Confectionary: chocolate, fondants
- Beverages: alcoholic, soft
- Dairy products: milk, cheese, yogurts
- Personal care products: shampoo, soaps, deodorants, cosmetics
- Pet foods
- Pulp & paper
- Chemicals: lubricants, paints & pigments, polymers

Rotary Lobe Pumps are the mainstay of many hygienic & industrial fluid handling applications where gentle handling & cleanability are paramount.

ADVANTAGES

Non Contacting Pumping Principle | No metal on metal contact, avoiding pump wear regardless of product viscosity

Shaft Sealing Options | Include single, single flushed and double mechanical seals, single and double O-ring Seals and packed glands

Porting Options | Multiple porting options cover hygienic and industrial threaded, clamp and flanges arrangements

Low Shear Pump Design | Gentle handling of delicate and shear sensitive products

Solids Handling | Will handle a wide range of products including suspended solids

Hygienic Designs | Used in a wide range of hygienic industries where cleanliness is important

CAPACITY
to 832 GPM
(189 m³/h)

PRESSURE
to 218 PSI
(15 BAR)

VISCOSITY
to 2,000,000 SSU
(440,000 cSt)

TEMPERATURE
to +300°F
(+150°C)

VANE PUMPS

WHY? The vane pump is the ideal solution for high pressure, thin liquid applications.

INCLUDED PRODUCTS

■ LVP Series™

MATERIALS OF CONSTRUCTION & CONFIGURATION OPTIONS

EXTERNALS (HEAD & CASING)

316 stainless steel

INTERNALS (ROTOR & SHAFT)

316 stainless steel

INTERNALS (VANES & PUSH RODS)

PEEK

BUSHINGS

Silicon carbide

SHAFT SEAL

Component mechanical seal, cartridge mechanical seal, cartridge triple lip seal

TYPICAL APPLICATIONS

Common vane pump applications include, but are not limited to:

- Acids & alkalis
- Alcohols & solvents
- Aqueous solutions
- Monomers
- Hexane, pentane
- Refined fuels
- Reactor vessel ingredient metering
- Vacuum vessel service
- Suction lift applications
- Long suction or discharge line applications

Learn how vane pumps work

ADVANTAGES

Opposite Porting | For easy in-line mounting

Seal Chamber | Accommodates the use of component and cartridge seals

Hardened 316SS Housing with Non-Metallic Pumping Elements | Offer broad chemical compatibility and enhanced application flexibility

Rated to 200 PSI | Even on the thinnest liquids

Self-Priming Capabilities | Simplify start-up process

Sliding Vane Design | Self-adjusts for wear to maintain consistent performance

Superior Volumetric & Mechanical Efficiency | For low energy consumption

Internal Relief Valve | Provides over pressure protection

Gauge Ports | Allow simple addition of local or remote monitoring systems

CAPACITY
to 160 GPM
(36 m³/h)

PRESSURE
to 200 PSI
(14 BAR)

VISCOSITY
to 2,300 SSU
(to 500 cSt)

TEMPERATURE
-60°F to +350°F
(-50°C to +175°C)

Other Advantages	Simple, two-moving part design, easy to repair Only one or two bearings run in pumpage	Runs at motor speeds Low flow, high pressure	Vanes compensate for wear to maintain efficiency	Clean-in-place and sterilize-in-place capabilities	Clean-in-place and sterilize-in-place capabilities
Other Disadvantages	May require reduced speeds Overhung load on rotor shaft	Four bearings run in pumpage	Vane wear	Requires timing gears Overhung load on shafts	Requires timing gears Overhung load on shafts
Relative Initial Cost	Moderate	Moderate	Moderate	High	High

FEATURES & BENEFITS

- Rugged and reliable, yet economical
- Widest range of sizes and options available to suit almost any non-corrosive application
- Tightest clearances for high efficiency and excellent priming capability
- Universal stuffing box that accepts packing, O-Pro® seals, component seals or cartridge mechanical seals

TYPICAL APPLICATIONS

- Adhesives
- Asphalt & Bitumens
- Paints & Inks
- Polymers
- Resins
- Chocolate
- Peanut Butter
- Molasses
- Refined Fuels
- Edible Oils
- Non-Corrosive Chemicals

PORTING

- Right Angle (90°) (Rotatable Casing)
- Opposite (180°) (Rotatable Casing)
- NPT
- Flanged (ANSI/ASME or DIN Compatible)

SEALING

- Packing
- O-Pro® Seal
- Behind the Rotor Seal
- Component Mechanical Seal
- Cartridge Mechanical Seal
- Cartridge Triple Lip Seal
- Sealless Mag Drive

MOUNTING

- Foot Mount

OPTIONS

- Jacketing
- Ductile Iron (126A Series™, 4126A Series™)

DRIVES

Refer to "Appendix A" on page 42 for more information on drives.

Refer to "Appendix B" on page 43 for more information on seals and porting.

CAPACITY
to 1,600 GPM
(363 m³/h)

PRESSURE
to 200 PSI
(14 BAR)

VISCOSITY
to 2,000,000 SSU
(to 440,000 cSt)

TEMPERATURE
-60°F to +450°F
(-50°C to +230°C)

124A (*non-jacketed, packing*)

224A (*jacketed, packing*)

324A (*jacketed, packing*)

- Handle the highest viscosity liquids, up to 2,000,000 SSU
- Packing requires some minimal leakage for cooling and lubrication

1124A (*non-jacketed, O-Pro® Barrier seal*)

1224A (*jacketed, O-Pro® Barrier seal*)

1324A (*jacketed, O-Pro® Barrier seal*)

- O-Pro® Barrier is a single piece seal that replaces both the shaft bushing and seal, provides easy maintenance for high viscosity and hard to seal liquids

4124A (*non-jacketed, mechanical seal*)

4224A (*jacketed, mechanical seal*)

4324A (*jacketed, mechanical seal*)

- Component and cartridge mechanical seals handle lower viscosity liquids with minimal leakage
- The bearing housing opening enables seal maintenance or replacement without removing the pump

4124B (*non-jacketed, behind the rotor seal*)

4224B (*jacketed, behind the rotor seal*)

- Value-oriented pumps, with a mechanical seal located directly behind the rotor, and a greased bracket bushing not contacting the process liquid, allowing for long life
- Optional hard-faced, pin driven mechanical seals enable operation on abrasive liquids and on viscosities up to 250,000 SSU (55,000 cSt)

8124A (*sealless mag drive*)

- Eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous and difficult-to-seal liquids

Note: Product images may not reflect standard construction.

FEATURES & BENEFITS

- For refinery and petrochemical applications
- Recommended for extremely high temperatures
- Widest range of sealing options available

TYPICAL APPLICATIONS

- Crude Oil
- Fuels
- Lube Oil
- Basic Petrochemicals
- Asphalts & Bitumens
- Heat Transfer Fluids

123A (non-jacketed, packing)

223A (jacketed, packing)

- Handle the highest viscosity liquids, up to 2,000,000 SSU
- Packing requires some minimal leakage for cooling and lubrication

4123A (non-jacketed, mechanical seal)

4223A (jacketed, cartridge seal)

- Component and cartridge mechanical seals handle lower viscosity liquids with minimal leakage
- The bearing housing opening enables seal maintenance or replacement without removing the pump

4223AA (API 682 Seal, API 676 Compliant w/ minor Exceptions)

4323AA (API 682 Seal, API 676 Compliant w/ minor Exceptions)

- Bracket features enlarged bearing housing to fit API 682 Cat. 1, 2 or 3 cartridge seals with seal plans
- Conforms to API 676 3rd Edition, with exceptions
- NDE and performance testing required by API 676 is optional

4223AX (API 682 Seal, API 676 Full Compliance)

4323AX (API 682 Seal, API 676 Full Compliance)

- Conforms fully to API 676 3rd Edition, no exceptions
- API 682 Cat. 1, 2 or 3 cartridge seals with seal plans
- All NDE and performance testing required by API 676 is included, as standard

8123A (sealless mag drive)

- Eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous and difficult-to-seal liquids

Note: Product images may not reflect standard construction.

FEATURES & BENEFITS

- For corrosion resistance over a wider pH range
- Non-galling gear materials available for handling thin liquid applications
- All stainless steel construction or economical 724 Series™ & 4724 Series™

TYPICAL APPLICATIONS

- Soaps, Detergents & Surfactants
- Acids & Caustics
- Water-Based Liquids
- Vegetable Oil
- General Chemicals

Refer to "Appendix B" on page 43 for more information on seals and porting.

CAPACITY
to 1,600 GPM
(363 m³/h)

PRESSURE
to 200 PSI
(14 BAR)

VISCOSITY
to 2,000,000 SSU
(to 440,000 cSt)

TEMPERATURE
-120°F to +500°F
(-85°C to +260°C)

127A (non-jacketed, packing)

227A (jacketed, packing)

- Handle the highest viscosity liquids, up to 2,000,000 SSU
- Packing require some minimal leakage for cooling and lubrication

1127A (non-jacketed, O-Pro® Guard seal)

1227A (jacketed, O-Pro® Guard seal)

1327A (jacketed, O-Pro® Guard seal)

- O-Pro® Guard provides a robust sealing solution for high viscosity and hard to seal liquids
- O-Pro® Guard rebuildable design offers minimal downtime and low cost

4127A (non-jacketed, mechanical seal)

4227A (jacketed, cartridge seal)

- Component and cartridge mechanical seals handle lower viscosity liquids with minimal leakage
- The bearing housing opening enables seal maintenance or replacement without removing the pump

724 (jacketed, packing)

4724 (jacketed, mechanical seal)

- Non-wetted cast iron mounting bracket
- Behind the rotor mechanical seal
- Jacketed bracket standard
- Most economical stainless steel series

4227AA (API 682 Seal, API 676 Compliant w/ minor Exceptions)

4327AA (API 682 Seal, API 676 Compliant w/ minor Exceptions)

- Bracket features enlarged bearing housing to fit API 682 Cat. 1, 2 or 3 cartridge seals with seal plans
- Conforms to API 676 3rd Edition, with exceptions
- NDE and performance testing required by API 676 is optional

4227AX (API 682 Seal, API 676 Full Compliance)

4327AX (API 682 Seal, API 676 Full Compliance)

- Conforms fully to API 676 3rd Edition, no exceptions
- API 682 Cat. 1, 2 or 3 cartridge seals with seal plans
- All NDE and performance testing required by API 676 is included, as standard

8127A (sealless mag drive)

- Eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous, corrosive and difficult-to-seal liquids

Note: Product images may not reflect standard construction.

MOTOR SPEED PRODUCT LINE | DUCTILE IRON

FEATURES & BENEFITS

- Needle bearings provide high pressure capabilities, sleeve bearing options available
- Close-coupled motor mount or foot bracket options to match space or motor requirements
- Double pump configurations offer two flow rates operating from a single power source, reducing equipment costs

TYPICAL APPLICATIONS

- Pipeline Injection
- Pipeline Sampling
- Oil Polishing
- High Pressure Lubrication
- Hydraulics

Integral pressure relief valve standard (single pump).

① SG-05 models available with UL 343 listing for fuel oil.

NOTE: Refer to the catalog section of a particular product series for specific performance details.

PORTING SEALING

- Opposite (180°)
- NPT
- SAE O-Ring
- SAE Flange
- Lip Seal
- Component Mechanical Seal
- Sealless Mag Drive

Refer to "Appendix B" on page 43 for more information on seals and porting.

MOUNTING

- Foot Mount (with Footed Bracket)
- Motor Mount Bracket to IEC & NEMA Motors (Close-Coupled)
- Vertical Mount

OPTIONS

- Double Pump

DRIVES

Refer to "Appendix A" on page 42 for more information on drives.

CAPACITY
to 190 GPM
(719 LPM)

PRESSURE
to 500 PSI
(34 BAR)

VISCOSITY
to 1,000,000 SSU
(to 250,000 cSt)

TEMPERATURE
-40°F to +450°F
(-40°C to +230°C)

SG-05 (*lip seal*)

- Wide range of viscosities
- Economical option for clean lubricating liquids
- Needle bearings as standard

SG-407 (*mechanical seal*)

- Used for thin liquids
- Carbon graphite bearings as standard

SG-807 (*sealless mag drive*)

- Sealless technology to eliminate seal leakage at pressures to 500 PSI (34 Bar)

ALSO AVAILABLE:

CMD Series™ Composite Mag Drive

- Non-metallic external gear design for corrosive and difficult to seal liquids.

MODELS	SPECIFICATIONS							
	Nominal Flow At 1450 RPM		Nominal Flow At 1750 RPM		Pressure		Standard Ports

In-line valve sold separately.

Note: Product images may not reflect standard construction.

FEATURES & BENEFITS

- The most compact gear pump series available to fit tight space constraints
- Vertical mounting options to further reduce the unit footprint
- High speed operation for the most economical pump option for thin to moderate viscosity applications

TYPICAL APPLICATIONS

- Refined Fuels
- Lube Oils
- Rotating Equipment Lubrication
- Mobile Pump Carts
- Glycols
- Pipeline Sampling
- Isocyanates

VISCOSITY
to 25,000 SSU
(to 5,500 cSt)

TEMPERATURE
-40°F to +350°F
(-40°C to +180°C)

4195 (foot mount, behind the rotor seal)

- Behind the rotor mechanical seal with antifriction bracket bearing for motor speed operation
- Optional balanced seal for high inlet pressures
- NPT or Class 125 flange ports with optional Class 250 or DIN PN-25/40 flanges

(Pump shown mounted to a motor)

495 (bracket mount, behind the rotor seal)

- Flanged bracket for bell housing to close couple NEMA C or IEC B-14 motors
- Eliminates shaft alignment, easy mounting on equipment frames
- KE, KKE, LQE, LSE 4195 models have both foot for long-couple and bracket flange for close coupling

(Pump shown mounted to a motor)

475 (motor mount, behind the rotor seal)

75 (motor mount, lip seal)

- NEMA C-face mount for easy installation and a small footprint
- Simplified rotor retention system, economical for medium duty applications
- IEC mount option available

895 (sealless mag drive)

- Eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous and difficult-to-seal liquids
- Optional high pressure canister for inlet pressures up to 1,500 PSI (103 BAR)

Note: Product images may not reflect standard construction.

FEATURES & BENEFITS

- Close coupled to fit tight space constraints with vertical mount options for reduced unit footprint
- High speed operation for economical steel pump offering
- High working pressures for compressor lubrication and pipeline sampling applications
- Class 300 flanges standard on all sizes and models

TYPICAL APPLICATIONS

- Pipeline Sampling
- Fuels
- Compressor Lubrication
- Lube Oils

PERFORMANCE

INTERNAL GEAR MODELS			SPECIFICATIONS				
Foot Mount		Bracket Mount	Performance			Standard Ports

NOTE: Refer to the catalog section of a particular product series for specific performance details.

PORTING

- Opposite (180°)
- Flanged (ANSI/ASME or DIN Compatible)

SEALING

- Behind the Rotor Seal
- Balanced Seal
- Sealless Mag Drive

MOUNTING

- Motor Mount
- Foot Mount
- Vertical Mount

DRIVES

Refer to "Appendix A" on page 42 for more information on drives.

Refer to "Appendix B" on page 43 for more information on seals and porting.

CAPACITY
to 115 GPM
(27 m³/h)

PRESSURE
to 250 PSI
(17 BAR)

VISCOSITY
to 25,000 SSU
(to 5,500 cSt)

TEMPERATURE
-20°F to +350°F
(-30°C to +180°C)

4193 (*foot mount, behind the rotor seal*)

- Behind the rotor mechanical seal with antifriction bracket bearing for motor speed operation
- Optional balanced seal for high inlet pressures
- Class 300 flange ports
- Conforms to API 676, with exceptions

493 (*bracket mount, behind the rotor seal*)

- Flanged bracket for bell housing to close couple NEMA C or IEC B-14 motors
- Eliminates shaft alignment, easy mounting on equipment frames

893 (*sealless mag drive*)

- Eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous and difficult-to-seal liquids
- Optional high pressure canister for inlet pressures up to 1,500 PSI (103 BAR)

Note: Product images may not reflect standard construction.

MOTOR SPEED PRODUCT LINE | STAINLESS STEEL

FEATURES & BENEFITS

- For corrosion resistance over a wider pH range
- Compact gear pump series to fit tight space constraints
- Non-galling gear materials standard for handling thin liquid applications

TYPICAL APPLICATIONS

- Water-Based Liquids
- Acids & Caustics
- Additives
- General Chemical

Integral pressure relief valve is standard.

NOTE: Refer to the catalog section of a particular product series for specific performance details.

PORTING

- Opposite (180°)
- Flanged (ANSI/ASME or DIN Compatible)

SEALING

- Behind the Rotor Seal
- Component Mechanical Seal (LVP)
- Cartridge Mechanical Seal (LVP)
- Cartridge Triple Lip Seal (LVP)
- Sealless Mag Drive

MOUNTING

- Motor Mount
- Foot Mount

DRIVES

M = LVP40017 & LVP 40027 only
Refer to "Appendix A" on page 42 for more information on drives.

Refer to "Appendix B" on page 43 for more information on seals and porting.

CAPACITY
to 160 GPM
(36 m³/h)

PRESSURE
to 200 PSI
(14 BAR)

VISCOSITY
to 25,000 SSU
(to 5,500 cSt)

TEMPERATURE
-40°F to +350°F
(-40°C to +180°C)

4197 (*foot mount, behind the rotor seal*)

- Behind the rotor mechanical seal with antifriction bracket bearing for motor speed operation
- PTFE wedge-type mechanical seal standard for corrosive liquids
- Class 150 flange ports

897 (*sealless mag drive*)

- Eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous, corrosive and difficult-to-seal liquids
- Optional high pressure canister for inlet pressures up to 1,500 PSI (103 BAR)

LVP (*mechanical seal*)

- Vane pump design offers ANSI or DIN flanges, and IEC or NEMA motor mounts to conform to international standards for enhanced application flexibility
- High pressure and high efficiency with thin liquids
- 20 minute inline vane replacement reduces scheduled downtime
- Harder components than other vane pumps extend pump life
 - 62 Rockwell C surface-hardened one-piece, 316 stainless steel casing
 - Silicon carbide sleeve bearings
 - Chrome oxide shaft coating

Note: Product images may not reflect standard construction.

CIRCUMFERENTIAL PISTON PRODUCT LINE | STAINLESS STEEL

FEATURES & BENEFITS

- Low shear pump design for gentle handling of delicate and shear sensitive products
- Handles a wide range of products including suspended solids
- High volumetric efficiency on low viscosity products
- Used in a wide range of hygienic industries where cleanliness is important

TYPICAL APPLICATIONS

- Dairy
- Bakery
- Meat Processing
- Foods
- Beverage
- Confectionary
- Personal Care
- Pharmaceutical
- Paints
- Chemical

Revolution® Series

TRA®20 Series

TRA®10 Series

PORTING

- Hygienic port options:
Tri-clamp, DIN 11864, DIN 11851 Male, SMS Male (Revolution®)
- Industrial port options:
ASA/ANSI 150 lb. or 300 lb. RF, DIN 2633, BSP Male, NPT Male (Revolution®)
- Complete range of hygienic clamp, screw, flange & industrial screw connections (TRA)
- Tri-clamp, flanged, DIN, IMDA, NPT, BSP, etc. (TRA)
- Rectangular flange/hopper inlet available on select sizes

Refer to "Appendix B" on page 43 for more information on seals and porting.

SEALING

- Single mechanical
- Double mechanical w/ flush
- Single O-ring (Revolution®, TRA®10)
- Double O-ring w/ flush (Revolution®, TRA®10)

ROTORS

- Non-galling WFT 808® nickel alloy standard
- Optional clearances:
front face, hot, high temperature/high viscosity (chocolate)
- Twin wing rotors standard, single wing rotors optional (TRA)

GEAR BOX

- Stainless steel

CAPACITY
to 450 GPM
(102 m³/h)

PRESSURE
to 500 PSI
(34 BAR)

VISCOSITY
to 2,000,000 SSU
(440,000 cSt)

TEMPERATURE
to +300°F
(to +150°C)

ROTARY LOBE PRODUCT LINE | STAINLESS STEEL

FEATURES & BENEFITS

- Low shear pump design for gentle handling of delicate and shear sensitive products
- Handles a wide range of products including suspended solids
- High volumetric efficiency on low viscosity products
- Used in a wide range of hygienic industries where cleanliness is important

TYPICAL APPLICATIONS

- Pharmaceutical
- Personal Care
- Foods
- Beverage
- Dairy
- Confectionary
- Chemical
- High Fructose Corn Syrup
- Vinegar
- Vegetable Oils

SteriLobe® Series

Revolution® Series

Classic+ / MultiPump® Series

RTP® Series

PORTING

- Complete range of hygienic clamp, screw, flange & industrial screw connections (C+/MP)
- Tri-clamp, flanged, DIN, IMDA, NPT, BSP, etc. (C+/MP)
- Hygienic port options: Tri-clamp, DIN 11864, DIN 11851 Male, SMS Male (Revolution®)
- Industrial port options: ASA/ANSI 150 lb. or 300 lb. RF, DIN 2633, BSP Male, NPT Male (Revolution®)
- Rectangular flange/hopper inlet available on select sizes (Rev)
- Camlock, ACME & DIN 11851 ports available (RTP®)

SEALING

- Single O-ring (C+/MP, Rev, RTP®)
- Single mechanical (C+/MP, Rev)
- Single mechanical with flush or quench (C+/MP)
- Double O-ring (RTP®)
- Double O-ring with flush (Rev)
- Double mechanical with flush (C+/MP, Rev)
- Gland packing (C+/MP)
- Gland packing with lantern ring with flush (C+/MP)
- Mechanical Seals (RTP®)

ROTORS

- 316L standard
- Optional clearances: Different temperature clearance bands available dependent on application and cleaning requirements

GEAR BOX

- Stainless Steel, Powder coated or painted cast Iron dependent on series and model
- Oil lubrication standard, grease optional (Revolution®)
- Ingress protected and sealed lightweight aluminum gearbox (RTP®)

Refer to "Appendix B" on page 43 for more information on seals and porting.

CAPACITY
to 832 GPM
(189 m³/h)

PRESSURE
to 218 PSI
(15 BAR)

VISCOSITY
to 2,000,000 SSU
(440,000 cSt)

TEMPERATURE
to +300°F
(+150°C)

LIQUID-SPECIFIC PRODUCT LINE

Through 110+ years of pumping experience, our engineers have developed uniquely designed products with a specific application in mind. These products focus on solving targeted challenges that exist within that liquid application.

From speed to viscosity, sealing or shear, these products provide additional security that the product is right for the applications they are built for.

ABRASIVE LIQUID

4624B Series™

FEATURES & BENEFITS

- Extended service life provided by:
 - Tungsten carbide components in critical wear areas of pump
 - Other hardened component options available
 - Silicon carbide mechanical seal faces
 - Positive seal flush to keep fresh supply of liquid at seal faces
 - Behind the rotor seal placement eliminates abrasive wear on shaft bushing
 - Pin drive mechanical seal increases viscosity range
- For abrasive liquids such as paints, inks and waste oil

MODELS		SPECIFICATIONS				
Non-Jacketed		Performance			Standard Ports	
Behind the Rotor Seal		Max Speed, RPM	GPM	m³/h	Size, Inches	Type
F4624B		870	0.75	0.2	0.5	NPT
FH4624B		870	1.5	0.3	0.5	NPT
H4624B		640	5	1.1	1.5	NPT
HL4624B		640	10	2.3	1.5	NPT
K4624B		280	25	5.7	2	NPT
KK4624B		280	35	8	2	NPT
L4624B		230	50	11	2	NPT

LL4624B		230	65	15	3	Flange
LS4624B		230	72	16	3	Flange
Q4624B		190	110	25	3	Flange
QS4624B		190	182	41	6	Flange

Integral pressure relief valve is standard.

Abrasion resistant components also available in other series and sizes.

AMMONIA (REFRIGERATION)

4924A Series™

FEATURES & BENEFITS

- Double mechanical seal with pressurized seal chamber and oil reservoir pressurized by ammonia, no external flush system required
- Adjustable return-to-tank pressure relief valve
- Pressure-lubricated idler bushing maximizes bushing life
- Designed for liquid overfeed ammonia refrigeration systems
- New bearing housing design simplifies end clearance adjustment and maintenance

MODELS		SPECIFICATIONS				
		Performance			Standard Ports	
Mechanical Seal		Max Speed, RPM	GPM	m³/h	Size, Inches	Type

Return-to-tank relief valve standard.

Note: Product images may not reflect standard construction. Refer to "Appendix B" on page 43 for more information on seals and porting.

ASPHALT

34 Series™

FEATURES & BENEFITS: JACKETED, PACKING

- Jacketing suitable for hot oil or steam for enhanced application flexibility
- Belt drive or reducer drive options available
- Economical option for clean asphalt at low to moderate pressure

124E Series™, 324E Series™

FEATURES & BENEFITS: ELECTRICALLY HEATED, PACKING

- Lower installation costs in remote locations when steam or hot oil is not available or long piping runs are required
- Reduced environmental costs by eliminating hot oil leaks
- Reduced energy costs with heat source in pump vs. external heat tracing
- Simplified service by eliminating hot oil or steam pipe connections
- Optional closed loop PID control system maintains tight control

1224A-ASP Series™, 1324A-ASP Series™

FEATURES & BENEFITS: JACKETED, O-PRO® CARTRIDGE SEAL

- Rugged design provides superior performance in asphalt applications
- Tight clearances offer high efficiency and excellent priming capabilities
- O-Pro® Cartridge seal combines reliable sealing with easy maintenance

Note: O-Pro® Cartridge Seal is patented.

Note: Product images may not reflect standard construction. Refer to "Appendix B" on page 43 for more information on seals and porting.

LIQUID-SPECIFIC PRODUCT LINE

CHEMICAL TANKER

RTPe Series™

CLEANABILITY

- The simple design behind the rotor makes strip cleaning easy and fast
- Choose the cleaning process that fits your needs: COP (Clean Out of Place) or CIP (Clean In Place)

EASE OF MAINTENANCE

- Innovative front loading seal design enables quick inspection and easy servicing
- Sealed gearcase with long-life lubrication eliminates oil inspection and filling
- Easy to service design requires no special tools for disassembly and eliminates need for end clearance adjustments

PERFORMANCE

- Wide range of chemical compatibility
- Efficiently handles both low and high viscosity liquids with improved pressure capabilities for faster loading and unloading
- Excellent displacement/weight ratios, which means more in the tank and less in the cabinet (1 l/rev. / 0.264 USG/rev.)
- Precision helical gears, rotors and shaft design, with optimized bearing position, minimize overhung load – extending seal & bearing life

CHOCOLATE

1224A-CHC Series™, 1227A-CHC Series™

FEATURES & BENEFITS

- EC1935 Compliant constructions
- Internal O-rings create a sealed lubrication chamber for the bracket bushing, increasing bushing life
- Trusted and proven with world leading chocolate manufacturers
- Low shear design protects delicate chocolate suspensions
- Hardened materials provide long life on abrasive liquors and chocolates

COLD ETHANOL - SOLVENT

4197-SEP Series™

FEATURES & BENEFITS

- Superior self-priming capabilities
- Low temperature mechanical seal
- Quiet pulsation-free flow
- Designed for continuous or intermittent duty cycle
- Assembled and tested with food grade liquids
- Reliable, steady flow regardless of changes in pressure or viscosity
- Electric motor driven and VFD compatible

MODELS	SPECIFICATIONS			
Behind the Rotor Seal	Nominal Flow (60 Hz)		Max. Differential Pressure	Standard Class 150 Flanged Ports

NOTE: Contact Viking Pump for performance curves specific to your application.

FUEL OIL

432-X Series™, SG-X Series™

FEATURES & BENEFITS

- UL343 listed for the handling of various fuel oils
- Intended for use in the assembly of power-operated, oil-burning appliances in accordance with ANSI/NFPA 31
- Products achieved UL certification through testing at the UL laboratory
- Capacities range from 0.5 to 20 GPM, with lip seal or mechanical seal options

HL432-X

SG-0514-X

Note: Product images may not reflect standard construction. Refer to "Appendix B" on page 43 for more information on seals and porting.

PARTS & ACCESSORIES

There are millions of Viking pumps installed throughout the world. Our parts and accessories are built to keep them running efficiently and make repairs easy.

Not all parts are created equal. Viking Genuine Parts come with a guarantee to dimensionally fit Viking products, as well as having consistent construction, including material grade and quality.

Whether purchasing an individual part, ordering a full repair kit, or choosing an accessory to make your systems work smoothly, ensure that you are maintaining your Viking pumps with the same quality of parts that it left the factory with. Choose Viking Genuine Parts when servicing your pumps. Reach out to your local stocking distributor to get parts on your shelves for proactive operational management.

PARTS & KITS

Viking Pump parts kits provide customers with the ability to do a complete repair at once vs. each time a part wears. Everything needed is included in the kit, ready before you open the pump. Both seal kits and repair kits are available. Reduce your downtime by contacting your local stocking distributor to have a kit on your shelf ready to go when it is needed.

DESIGN

- Only Viking Genuine Parts are specifically designed to meet performance requirements for Viking pumps

QUALITY

- Viking Genuine Parts are tested to ensure optimum reliability

SUPPORT

- Viking backs all Genuine Parts with its own warranty and stocking distributor network

PARTS KITS VS. PARTIAL REPAIR

Everything you need in one place

Save time & money

Increase uptime

Increase service life

Reduce frequency of repairs

WHY REMANUFACTURE?

(Unique to circumferential piston products)

- Worn pump is returned to like-new condition & performance
- Your remanufactured pump carries a full 1 year factory warranty
- All remanufactured pumps are tested & certified
- Save big compared to purchasing an entirely new pump
- Pumps can be remanufactured up to four times, depending on model & wear

WHAT YOU GET

- NEW Rotors
- NEW Bearings
- NEW Seal Components
- NEW Shafts
- NEW Gears

REBUILD VS. REPLACE

- Hygienic parts kits are designed to save time and money, making preventive maintenance and rebuilding easier and more cost-effective
- Hygienic pumps are designed and built to the highest standards, for long life and to be rebuilt instead of replaced when applicable
- Tool kits also available

REDUCERS

OFFSET

- Fully interchangeable ratios in each gearbox
- Gearbox is rotatable on mounting bracket to enable multiple mounting brackets enable output shaft to match Viking shaft heights

Learn about Reducers

IN-LINE

- Available in multiple sizes and a variety of ratios to 200 HP / 160 kW
- Universal mounting - solid input shaft or motor mount option (IEC or NEMA)

STRAINERS

LID-EASE STRAINERS

- Quarter-turn, easy opening breech-lock lid simplifies routine cleaning
- Inclined basket design provides low pressure drop for high system efficiency
- Top basket removal eliminates the need to drain the strainer and minimizes product loss

Learn about Strainers

BOLTED-LID STRAINERS

- High quality, easy to clean simplex strainers
- Low pressure drop
- Gauge ports standard (plugged)
- Lid vent standard (plugged)
- Bottom drain (plugged)

MOTORS

DRIVE MOTORS

- Ease of ordering to get pump and motor from one supplier
- Competitive pricing direct through Viking Pump
- All major brands and types available
- Energy efficient, compliant with EISA and EC640/2009 standards

Note: Product images may not reflect standard construction.

MATERIALS

CAST IRON

For most non-corrosive applications. Least cost, best resistance to galling. *(Various coating options for hardness)*

DUCTILE IRON

Alternative to steel for refinery and petrochem applications, used on some rotors for higher viscosity. *(Grades range from pearlitic to ferritic)*

STEEL

For refinery and petrochem applications or extremely high temperatures. Optional rotor material for highest viscosities. *(Grades range from cast low alloy to various types of carbon steel)*

STAINLESS STEEL

For corrosion resistance over a wider pH range. *(Grades range from 316L, 317, 347 and 770, to duplex and martensitic)*

ALLOY 20

Austenitic stainless steel for sulfuric acid.

DRIVES

"B" DRIVE

Pump is mounted to a bracket (32 Series) or foot (SG Series).

"D" DRIVE

Pump is direct connected to a motor or gear motor.

"IM" DRIVE

Vertically inline mounted motor speed product line steel pumps.

"M" DRIVE

Pump is mounted to a bell housing which accepts a C-face NEMA or IEC motor. A flexible coupling connects pump shaft to drive shaft.

"M4" DRIVE

Tang shaft spur gear product line pumps mounted directly to tang drive motors.

"P" DRIVE

Pump unit (pump, gear reducer, motor, base, couplings and guards) using a non-standard "purchased" gear reducer.

"R" DRIVE

Pump unit (pump, gear reducer, motor, base, couplings and guards) using a Viking offset gear reducer.

"V" DRIVE

Pump unit (pump, motor, base, sheaves, belts and guard) using v-belts for speed reduction.

APPENDIX B

SEALS

PACKING

For highest temperatures and a wide range of viscosities.

O-PRO® BARRIER SEAL

Prevents leakage on hard to seal, viscous liquids. Incorporates shaft bushing protection from pumped liquid.

O-PRO® CARTRIDGE SEAL

Prevents leakage on hard to seal, viscous liquids. Available with FFKM elastomers for high temperature or corrosive service.

COMPONENT MECHANICAL SEAL

Located in stuffing box or behind the rotor, component seals are an economical means of limiting leakage.

SEALLESS MAG DRIVE

Eliminates shaft seals altogether, the ultimate solution to preventing seal leakage.

LIP SEAL

Dynamic elastomeric seals energized with a spring, for very high viscosity capabilities.

O-PRO® GUARD SEAL

Prevents leakage on hard to seal, viscous liquids. Sleeved design avoids shaft wear concerns.

O-RING SEAL

A simple low cost seal design with a wide range of application areas.

CARTRIDGE SEAL

Single or double mechanical, or triple lip seals; back pull-out design simplifies replacement.

API 682 SEAL

Category 1, 2 or 3, with API seal plans for petroleum and petrochemicals.

NOTE: O-Pro® seals are patented.

VERTICAL INTEGRATION

Viking Pump operates a foundry, a 250,000+ sq. ft. machining, assembly and testing center, and an extensive product engineering and testing lab in its world headquarters in Cedar Falls, Iowa, USA. This level of vertical integration ensures maximum quality, ability to satisfy special needs, and to meet project schedules.
